

Tetrad of Practice

Tetrad of Practice is tool for Product Owners and stakeholders to judge the effect of new functionality to be introduced into a product. Tetrad of Practice is helpful to determine the life cycle of functionalities within a product.

Retrieval: What the practice recovers which was previously lost. Code review brings back the wider understanding of code and design with in the team.

Reversal: 100% code review may lead to sloppiness in code writing because of assurance of code review.
