Trade-off Matrix

Trade-off Matrix is a tool for Release Planning. It helps to convey message that Release planning is not firm commitment but an approximation.

	Fixed	Firm	Flexible
Scope (Features)			
Schedule (time)			
Resources ($)			

Trade off matrix is a tool to identify critical aspects of release. POs, devTeams, and Stakeholders should work collaboratively to mark exactly one cell in each row as fixed, firm, or flexible. Only three cells are marked in the grid (one cell per row).
